

BURHA LUIT

বুড়া লুইত

Show control for theatre: sound, pictures, video and surtitles from one cue list

Installation Guide

Version 2.0 · October 2026

In fond memory of

Late Thaneswar Goswami (my father) and Late Arpan Bezbaruah (my uncle)

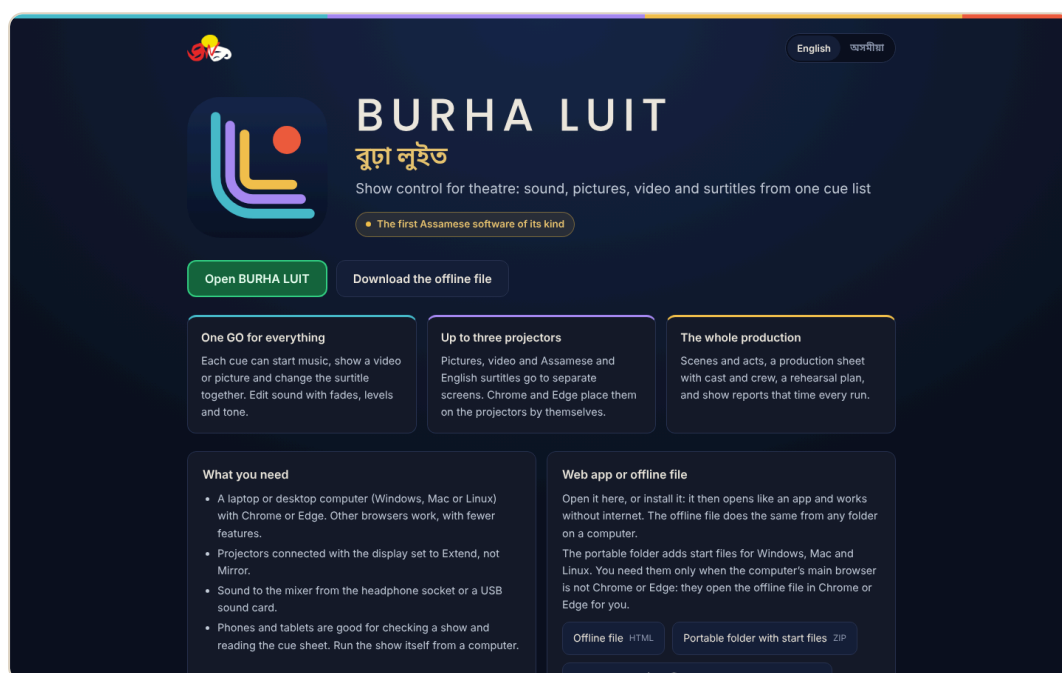

How to open, install and keep BURHA LUIT safe on a computer, a phone or a tablet.

1 Two ways to use BURHA LUIT

BURHA LUIT runs in a web browser. Nothing is installed from an app store, and your work stays on your own device.

- **Web app:** open <https://aank.org/apps/burha-luit/>. You can install it from there; it then works without the internet and updates itself.
- **Single file:** `BURHA-LUIT-2.0.html`, for laptops and desktops. Download it once and open it in Chrome or Edge, even with no internet.

The BURHA LUIT page on the AANK website: <https://aank.org/digital-tools/burha-luit/>

The BURHA LUIT start page at aank.org/apps/burha-luit/

2 Install on an Android phone or tablet

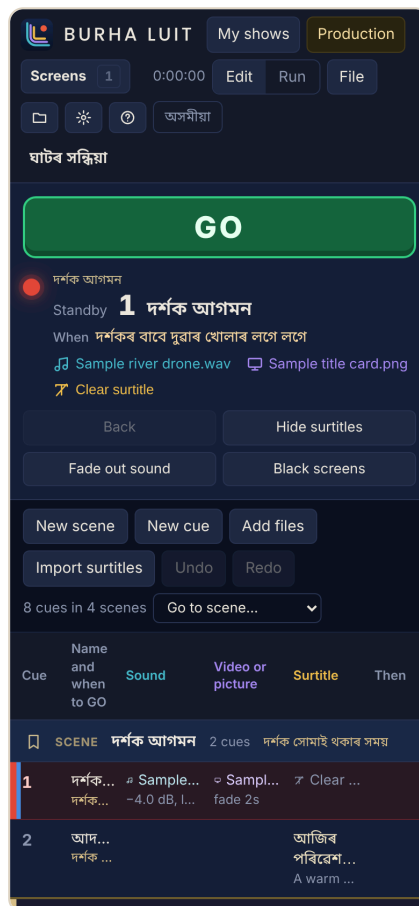

1. Open <https://aank.org/apps/burha-luit/> in Chrome.
2. Tap **Install on this device** on the start page. If you do not see it, open the Chrome menu (:) and choose **Install app** or **Add to Home screen**.
3. Open BURHA LUIT from its new icon. After the first visit it also works offline.

3 Install on an iPhone or iPad

1. Open <https://aank.org/apps/burha-luit/> in **Safari**.
2. Tap the **Share** button, then **Add to Home Screen**, then **Add**.
3. Open BURHA LUIT from the new icon on the Home Screen.

Good to know

On iPhone and iPad every browser uses Safari's engine, so installing is done only through Add to Home Screen. Always open the app from the Home Screen icon: Safari may clear the stored data of a website that is not opened for about a week, but a Home Screen app keeps its data.

BURHA LUIT on a phone, for checking a show

4 Install on a computer

Windows, macOS, Linux and ChromeOS.

1. Open <https://aank.org/apps/burha-luit/> in Chrome or Edge.
2. Click **Install on this device** on the start page, or the install icon at the right end of the address bar.
3. BURHA LUIT opens in its own window and gets an icon like any other program. It works offline.

5 The single-file version

1. On the start page, choose **Download the offline file**. The file is `BURHA-LUIT-2.0.html`.
2. Keep it in a folder you can find again, for example Documents/BURHA LUIT.
3. Double-click it to open it in Chrome or Edge. If another program opens it, right-click the file, choose **Open with**, then Chrome or Edge.

The single file is meant for computers. To share BURHA LUIT with someone, send the web link, not the file.

6 Phones and WhatsApp

- Share the link <https://aank.org/apps/burha-luit/> on WhatsApp. If WhatsApp opens it inside its own viewer, tap  or Share and choose **Open in Chrome** or **Open in Safari**.
- An HTML file sent on WhatsApp usually opens in a preview that blocks apps. If you see the line “This viewer has blocked the app”, open the link in Chrome or Safari instead.
- Phones are good for viewing and small changes. For full work use a laptop or desktop with Chrome or Edge.

7 Keeping your work safe

- Your work is saved automatically in the browser on this device.
- Use **File > Pack show with media** often. It saves a BURHA LUIT show file with all its media (`.luit`) that you can keep, copy and open on another device.
- The **Last file copy** chip in the app shows when you last saved a file. Its colour changes after seven days.
- The last five versions are kept as automatic backups. Open **About** to see them and restore one.
- If the browser cannot save, a warning appears at once. Save a project file then.
- Keep a copy of your project files on Google Drive, a pen drive or in your email.
- Clearing the browser’s data removes work that is saved only in the browser. Save a project file first.

8 Updates

- The web app updates itself. When a new version is ready, a bar says so: choose **Update now**.
- For the single file, download the new file from the start page. Your project files open in the new version.

Moving work between the AANK apps

BURHA LUIT is one of seven apps that work together: XUDHAKANTHA (the mother app), SILPA KUTIR, XUNPAKHILI, BURHA LUIT, AAROHAN, SRINIBARAN and KUMSUNG. Use **Send to...** to pass your production to another app and **Open from...** to receive work.

- On aank.org the work waits in a shared tray in your browser, so the other app finds it at once.
- Anywhere else, Send to... saves an `.aank` file. Open it in the other app with Open from....
- You can open it as a new production or add it to the current one.

Notes for BURHA LUIT

- **Sound output:** in Chrome and Edge choose it in **Settings › Sound** (laptop speakers, headphones, or a USB sound card to the mixer). In other browsers choose it in the computer's sound settings. Test left and right before every show.
- **Second screen or projector:** set the display to **Extend**, not Mirror. In **Screens** press **Find projectors** (Chrome and Edge ask once for permission to place windows), then **Open** for each screen and click the window once for full screen. If the browser blocks the window, allow pop-ups for the page.
- **Browser autoplay rules:** a browser plays sound only after you click or press a key in the app. Click **Enter** on the welcome screen, or press GO once during your checks, before the audience comes in. If a video plays without sound, click once in the BURHA LUIT window and GO again.
- **iPhone and iPad:** good for checking a show, reading the cue sheet and trying the sample show. Safari cannot choose the sound output or place screen windows on a projector, and screen windows open as separate tabs, so run performances from a laptop.
- **Start files:** the web app and the offline file do not need them. The portable folder `BURHA-LUIT-2.0-portable.zip` has start files for Windows, Mac and Linux that only open `BURHA-LUIT-2.0.html` in Chrome or Edge. Use them when the computer's main browser is something else; nothing else depends on them.
- **Media files** you add stay inside that browser on that computer; the web app and the offline file keep separate copies. Use the same browser every time, and take a show to another computer with **File › Pack show with media** (one `.luit` file).

11 What you need

Computer	Windows, macOS, Linux or ChromeOS with a recent Chrome or Edge (best). Firefox and Safari also open the app.
Android	A recent version of Chrome.
iPhone and iPad	Safari, with Add to Home Screen.
Internet	Only for the first visit and for updates.

12 Help and feedback

- Use **Feedback** in the app (in the Help menu or in About). The form opens your email app with the details filled in; nothing is sent until you send it.
- Email: mrinal.goswami2026@gmail.com
- Guides and news: <https://aank.org/digital-tools/>

Your work stays with you

Everything you make is kept on your device. Nothing is uploaded, and no account is needed.

BURHA LUIT (বুড়া লুইত) · Version 2.0

Created by Dr Mrinal Jyoti Goswami on behalf of AANK_A Creative Line, Assam, India.

© 2026 Dr Mrinal Jyoti Goswami and AANK_A Creative Line

This version is free and will remain free. We plan to offer a Pro version later, with a few more advanced features. The Pro version will be a paid edition.
